

Street Pro Side Rear Flaps **Assembly Instruction**

- 1.Check the fit of the flaps to the splitter so that the threaded holes in the splitter align with the cutouts in the flaps.
- 2.Using a bolt with a washer, lightly attach the flaps to the splitter so that it is possible to move the flaps.
- 3. The cutouts in the flaps allow you to set its ejection. Set the flaps as you see fit.
- 4.Once you align the flaps properly, tighten the bolts firmly against the splitter.
